Planning Effective Projects

January 17-18th, 2018
8:30-5:00pm

Overview

Coastal resource managers and local decision-makers are invited to attend this two-day NOAA Office for Coastal Management-led workshop. In this interactive workshop, using your own project idea, you will learn how to design it to achieve measurable results. You'll sharpen your skills in information gathering, project planning, and evaluation preparation, and walk away with confidence in how to build accountability and strategic thinking for project success. Space is limited to 30 people. Please register by January 3, 2017 to secure your spot.

“How can I be sure that my projects will reach the right audience and have the right impact?”

“What can I do to make sure that my efforts go beyond ‘the usual suspects’?”

“How do I measure the impact of my efforts?”

If you have ever asked yourself these questions, this course is for you!
